between the Agricultural and Mercantile Classes.

HOWEVER undeniable it is, that the mercantile class in general, has been prejudicial to the country, fo far; yet it is equally true that it may, by proper means, be converted into the most useful body of citizens in the state. Hitherto, it has not maintained that prudent relation hip with the farming interest which is dictated by a wife, a liberal and a faving policy. Its direct operation and tendency has been to draw out of the hands of the Agricultural class, what wealth it held and to appropriate it to their own use exclusively. This is evinced from the present compa-Lative state of wealth between the two classes. In the towns of the state, where the merchant in general concentrates his property, his dwelling his equipage, the apparent amount of bis stock in trade, the improvements that surround bim, and his domestic conveniences bear the aspect of a flourishing opulence. The quantity of cash that he fends out to a foreign market is enormous: his importations large and valuable, all of which Thew that his trade has preserved a ratio of increase. But let the medal be reversed, so far as it relates to the agricultural class. It is true that in some parts of the state the lands have been opened by industry, and that there are a few of the first rate farms under cultivation, with fome tolerable improvements appurtenant. But by far the greater part of the farming citizens have verged but little beyond their original fettlement and improvement. The balance of our territory is still in a state of Tavage uncultivation. The cabbin that dy of axatted uncultivation. The cabbin that dignity of manners: was built, the furniture with which it was stocked, and the forests that furrounded it when the proprietor first emigrated to the country, still retain their stand. Besides, if the lands have been opened, (which is the only thing that looks like improvement among this class) it has not been done by resources drawn in the paths of peace. altogether from our own foil, but by negroes who bave been brought into the country, and by the aid of what little. means otherwise that the emigrant could ed?" for verily the wicked will be aware the dead.
